SUMMARY

Cloud infrastructure engineer with a dual degree in Computer Science and Business Administration from Northeastern University, combining hands-on AWS systems ownership with cross-functional program delivery. Sole engineer owning client-facing AWS automation, observability, and reporting infrastructure across a 20+ brand portfolio; selected as one of 8 students for Northeastern's inaugural AWS Cloud Computing cohort. Targeting cloud infrastructure, platform engineering, and DevOps roles.

EDUCATION

Northeastern University, Khoury College of Computer Sciences

Boston, MA

B.S. Computer Science & Business Administration, Business Analytics Concentration

Expected May 2027

- One of **8 CS students** selected for Northeastern's **inaugural Seattle Cloud Computing Program** (Fall 2024) in partnership with AWS; dual enrollment at NU's Seattle graduate campus and Amazon Web Services Skills Center Seattle
- AWS Certified Cloud Practitioner: Expected June 2026

TECHNICAL SKILLS

Cloud & Infrastructure: AWS Lambda, S3, DynamoDB, EventBridge, API Gateway, SES, Secrets Manager, CloudWatch, Bedrock, IAM, CloudFormation, EC2, RDS, Serverless, Docker

IaC, Observability & Security: CloudFormation (IaC), CI/CD (GitHub Actions), CloudWatch Alarms & Automated Alerting, IAM Least-Privilege Access, Secrets Management, Incident Response

DevOps & Integrations: REST APIs, Webhooks, Polling Architecture, CRM Integrations (HubSpot, Salesforce)

Program Management: Agile/Scrum, Sprint Planning, Roadmap Execution, Risk Mitigation, Dependency Tracking, Cross-Functional Alignment, Requirements Gathering, Stakeholder Communication

Languages & Data: Python, SQL, JavaScript, Java, HTML/CSS, Pandas, Tableau, Excel, Airtable

Tools: Git, GitHub, GitHub Actions, VS Code, Figma, Google Tag Manager, Meta Ads Manager

EXPERIENCE

Waterside Group

Boston, MA

Cloud Infrastructure Engineer Co-op

Jan 2026 – Jun 2026

- **Sole engineer** owning all client-facing AWS systems across a 20+ brand portfolio; managed full lifecycle of production automation and reporting pipelines using Lambda, EventBridge, S3, DynamoDB, SES, Secrets Manager, and CloudWatch
- Architected end-to-end serverless reporting pipeline integrating ad performance data, attribution, and CPL metrics; automated stakeholder distribution via SES, eliminating manual reporting and enabling real-time campaign visibility
- Built HubSpot CRM integrations using webhooks and polling architecture; identified and resolved a live data contamination bug and extended integrations to additional client venues
- Deployed production AI chatbot on AWS Bedrock with Lambda, API Gateway, and DynamoDB session management; built serverless data extraction pipeline processing multi-format customer records across 4 iterative versions
- Managed CloudFormation infrastructure-as-code across client environments; configured CloudWatch alarms and automated alerting for proactive incident detection and faster pipeline health response

BaselineTech (via Scout, Northeastern's Venture Studio)

Boston, MA

Technical Product Manager

Aug 2025 – Dec 2025

- Led Agile sprint planning and backlog management for a 10-person cross-functional team; coordinated dependencies across design, engineering, and product to maintain on-time delivery across sprint cycles
- Scoped and standardized CTAs and user flows across a 6-page mobile-first product, reducing drop-off by **40%** and improving onboarding clarity through iterative technical scoping and UX iteration

NU Center for Entrepreneurship Education

Boston, MA

Data & Impact Co-op

Jan 2025 – Aug 2025

- Designed and built NUCEE's first automated reporting infrastructure using Python and Airtable; created **10+ data pipelines and automations** cutting manual reporting time by **50%** and consolidating data across 3 programs
- Consolidated multi-source data into unified dashboards adopted by **200+ stakeholders**, enabling real-time performance tracking and supporting FY25 impact reporting across 8,000+ students and 500+ ventures
- Led data migration and mentorship platform redesign for a NUCEE-affiliated organization, optimizing tracking for 300+ mentors and 500+ students

Aspire Institute

Remote

Data Analyst (NU Data Visualization Virtual Internship)

Apr 2024 – May 2024

- Analyzed alumni newsletter and digest performance data (open rates, click rates, content engagement) to surface patterns and build strategy recommendations, contributing to an **18% improvement in alumni retention**; built dashboards in Python, Tableau, and Excel with 2 analysts

INTERESTS

live performance/production (bass guitar, vocals, piano), strength training, photography, café hopping
